

Senior Front End Developer - Jumia (Full Time)

[Apply Now](#)

Company: Jumia

Location: Nigeria

Category: computer-and-mathematical

About Jumia :

Jumia believes that technology has the potential to transform everyday life in Africa for the better. Jumia was built to help consumers access millions of goods and services conveniently and at the best prices while opening up a new way for sellers to reach consumers and grow their businesses.

Listed on the New York Stock Exchange (NYSE) in 2019, Jumia is the leading e-commerce company in Africa, operating in 11 countries. The Jumia platform consists of a marketplace, which connects sellers with consumers, a logistics service, which enables the shipment and delivery of packages from sellers to consumers, and a payment service, JumiaPay, which offers a safe and easy solution to facilitate online payment transactions. The company offers goods across a broad range of categories, such as phones and electronics, home appliances, fast-moving consumer goods, fashion and beauty.

What you will be doing:

Be part of an agile team that develops smart logistics solutions on a service-oriented architecture using state-of-the-art technologies

In particular, you will:

Work closely with a multidisciplinary team (Backend developers, DevOps, QA engineers, Product Owners) oriented to continuous delivery

Work across the entire product life cycle: concept, design, development, deployment, testing, release, support

Construct and verify (unit test) software components to meet design specifications

Take ownership for your code to be qualitatively high and you will support your colleagues in code reviews

Integration of user-facing elements developed by front-end developers

Rapidly fix bugs and solve problems.

What we are looking for:

Understanding fundamental design principles behind a scalable application

Write and test interactive, clean, secure and efficient solutions

Help maintain a high-level quality code by reviewing your teammates' code

Continuously improve our code base, systems and processes

Keen to learn new technologies and have ideas about how we can make things better

Being passionate, self-driven and working with little supervision towards a common team or company purpose

Excellent communication skills and being able to work independently or in a full team

A professional with +5 years of frontend web experience

Proficient with at least one widely adopted single page application (SPA) architecture

Vanilla Javascript and modern frameworks and platforms such as AngularJS, Ember, ReactJS, VueJS and/or Node.js

Know module bundlers and task runners such as Webpack, Parcel, Rollup, Browserify, Grunt or Gulp

Creating a testable code and make testing a priority

Agile methodologies such as Scrum and Kanban

Passionate for coaching other engineers and building a strong team culture

We Offer :

A unique experience in an entrepreneurial, yet structured environment

A unique opportunity of having strong impact in building the African e-commerce sector

The opportunity to become part of a highly professional and dynamic team

An unparalleled personal and professional growth as our longer term objective is to train the next generation of leaders

Please ensure to only apply for jobs with Jumia through our official website. Jumia will never charge you a fee to apply for a job: be wary of websites that claim to help you apply for a Jumia job or that charge a fee to get you a job.
