

## Senior PHP Backend Developer

[Apply Now](#)

Company: IT Company

Location: Nigeria

Category: computer-and-mathematical

At IT Company (Contractor)

Expires at: 2024-06-25

Remote policy: Global remote

*We're a Digital Company and our passion lies in crafting cloud-based applications and scalable, high-performing micro-services that frequently integrate with APIs.*

### Responsibilities:

- Designing and executing critical engineering projects.
- Maintaining transparent communication throughout all stages of the product development lifecycle regarding ongoing and upcoming tasks.
- Crafting high-quality code and conducting thorough testing.
- Implementing features as per the roadmap.
- Creating APIs for utilization in both frontend and mobile applications.
- Continuously enhancing software quality through innovation and performance optimization efforts.
- Reviewing pull requests from team members to conduct constructive code reviews.
- Actively contributing to teammates' work through code reviews and design discussions to improve the team's shared understanding of our systems and enhance our technology.
- Leading discussions and achieving alignment with team members and stakeholders regarding the approach to your work.

- Promoting best practices across the team and in your work, and assisting others in balancing the tradeoffs between best practices and pragmatism.
- Effectively leading complex technical projects, delivering efficient, scalable, and resilient solutions
- Identifying and advocating for foundational work that can support work across the platform, foster workflow improvements, and create a substantial impact on the company.

### Main requirements

- Knowledge of **Italian** language at least at a conversational level (C2 level- should be able to read, write, and speak) is mandatory.
- Experience in working with complex systems is essential.
- A minimum of 8 years **programming** experience is required.
- Preferably **4+ years** of commercial **PHP experience** with emphasis on recent years, is preferred.
- Proficiency in **Symfony** is a must.
- Experience with **REST API** architecture, designs, and implementation is required.
- Familiarity with **Linux Docker** and **Kubernetes** is necessary.
- Demonstrated ability in top-notch software engineering and experience in designing and building RESTful, performant services are essential.
- Proficiency in breaking down large, complicated technical projects into clear stages and deliverables across multiple platforms is crucial.
- A strong history of cross-functional collaboration is required.
- Expertise in large system design, database performance, and handling large datasets is essential.
- Experience in building, enhancing, and maintaining large-scale APIs, with particular attention to PHP is advantageous.
- Fluent understanding and incorporation of engineering best practices such as testability into designs and execution is necessary.
- A track record of contributing to product and business direction, collaborating across different teams, and delivering pragmatic solutions that meet expectations is essential.
- A thorough understanding of development best practices such as SOLID, DRY, KISS, design patterns, and object design is necessary.

- Experience with testing code (unit, integration, functional) is essential.
- Understanding of fundamental design principles behind scalable applications is required.
- Good knowledge of **MySQL** or **MongoDB** is preferred.
- Proficiency in **GitHub/GitLab** is necessary.
- Strong problem-solving, decision-making, and effective communication skills are essential.
- Fluency in English is required.

#### Nice to have

- Working experience with another **programming language** such as Go or Python is advantageous.
